Internet Search and Suggestion Tool Helps to Easily Find a new .tel Name

ROME, /PRNewswire/ -- DomainsBot extensive "name spinner" Internet address search and suggestion tool now includes .tel names.

DomainsBot, the leading domain name suggestion and search engine company, announced it will include the innovative, communications-focused .tel names in their domain name search and suggestion tool, used by the majority of the world's best-known Internet domain name retailers including GoDaddy, Tucows and Register.com.

DomainsBot's "name spinner" tool is designed to help developers, site owners and marketers find available domain names when a first-choice domain name is already registered. DomainsBot offers a wide variety of results, including domain names that are available, expiring and for sale to ensure that businesses can easily find the best available domain name for their company and products.

"As more and more businesses, professionals, and savvy individuals see that the way in which people access the Internet for information and content is changing, the need for different solutions to present that information is also changing," said Daniel Ruzzini Mejia, Co-Founder & CSO, DomainsBot. "The .tel domain is now a significant part of being found on the Internet, as it helps potential customers find what they're looking for cheaply and quickly, regardless of the device or application that the person looking for the content is using; we wanted to make it possible for our customers to participate in this next wave of innovation for the Internet."
