

Broadband Products Selection Guide

Hutton Communications announces the release of a 200+ page Selection Guide devoted to its line of broadband products. The guide covers point to point radios, point to multipoint radios, in addition to related products such as antennas, lightning and surge protection, network hardware, power supplies, site hardware, spectrum analyzers, cable, connectors and adapters. Also included are application notes on several of the sections to identify and explain specific technology and uses of the product. The guide is also sorted by frequency so that radios and antennas are located conveniently together for easier ordering.
