

Data Conversion Product Guide

Acqiris has released a product guide that provides quick and easy reference to the company's line of data conversion products, which include CompactPCI, PCI, PXI, VXI, VME and OEM digitizers, time-to-digital converters and waveform analyzers with up to 8 GS/s performance. In addition, the brochure provides information on the company's portable turnkey systems and software support for Windows, Linux, VxWorks, and other real time operating systems (RTOS) as well as complete drivers and software examples for LabWindows/CVI and LabVIEW, C/C++ and Microsoft Visual Basic. The brochure also provides information on the company's three primary markets of commercial and industrial, defense and aerospace, as well as research and education and specific applications of Acqiris technology in those markets.
