Multi-Tech Systems Offers Sprint IDEN Customers Quick Migration Path

Multi-Tech Systems

Pre-validated M2M router an easy solution to help customers meet June transition deadline.

Minneapolis, MN – Multi-Tech Systems [1], a leading machine-to-machine (M2M) solutions provider, has teamed up with Sprint to deliver a quick and seamless migration from iDEN to Sprint's robust CDMA services. Multi-Tech's MultiModem rCell Intelligent Wireless Router is pre-validated by Sprint and now available via the M2M Wireless Devices portal and PCD (Personal Communication Devices).

"Multi-Tech supports the Sprint CDMA long-term roadmap to meet customer needs," says Matt Sharma, Executive Vice President of Multi-Tech. "We are committed to technology solutions to support Sprint's Network Vision rollout and to continuing our long term relationship."

Multi-Tech's MultiModem rCell Intelligent Wireless Router offers companies an ideal solution for any application needing cellular connectivity to monitor and manage remote devices from virtually anywhere. The intelligent embedded operating system allows for automatic/persistent connectivity for mission-critical applications and enhanced M2M communications functionality.

"The MultiModem rCell is a good fit for iDEN customers transitioning onto Sprint CDMA services," adds George Appling, President and CEO of PCD. "Our partnership with Multi-Tech provides a smart and reliable M2M solution for Sprint customers within a framework that is both expedient and convenient, further advancing our commitment to the Network Vision Plan."

Customers can easily begin their transition to Sprint CDMA via PCD's online ordering portal at www.m2mwirelessdevices.com [2], or may contact Multi-Tech at 888-288-5470 for further assistance.
