KATHREIN TechnoTrend Presents New Generation of Hybrid Receivers

KATHREIN TechnoTrend (KTT)

Premiere at the ANGA COM 2013 trade show at KATHREIN TechnoTrend booth B19 in Hall 10.2

Rohrdorf-Thansau – KATHREIN TechnoTrend (KTT) [1], one of the leading international developers and suppliers of innovative digital technology, is presenting for the first time its new TT-smart device series.

With these new devices based on BroadCom chipsets enabling tailored OTT, HbbTV and SmartTV solutions, KATHREIN TechnoTrend is establishing itself as partner for network operators and platform providers in the international operator market.

The new receiver portfolio with modern design ranges from DVB and IPTV Zappers with embedded Conax, Verimatrix, Irdeto or Nagravision CA systems and CI+ modules over powerful hybrid receivers and PVRs with own and third party middleware to OTT- and cloud-based solutions.

KATHREIN TechnoTrend’s unique open-API middleware PHOENIX enables KTT and our partner system middleware providers to adapt to specific customer requirements and thus allows versatile new business models to operators.

The new SmartTV platform, which was implemented in cooperation with FOXXUM, one of the leading specialists in SmartTV solutions, gives access to over 250 SmartTV apps. In addition, KTT offers newly integrated solutions for Video-on-Demand, Catch-Up TV und IP-Streaming. At the ANGA COM premiere, KTT will also be showing its home networking solutions for multi-screen and multi-device applications, such as LiveTV streaming or uPnP applications.

“Our new generation of high-performance devices is combining our own know-how as receiver developer with the special expertise of our system partners to generate new value and business opportunities for our operator customers“, explains Volker Belz, CSO of KATHREIN TechnoTrend.

"By a strict and consistent technical standardization and integration of efficient middleware combinations, we are offering very attractive and powerful CPE solutions for network operators of any size and any environment. Thereby, flexibility to customer requirements, sustainable quality and – of course – price are our highest priorities.”
