Teseq Calibration Services at EMC UK Exhibition for First Time

Teseq

EMC UK Newbury, Berkshire, October 8th and 9th

This year Teseq have increased their presence at the EMC UK Exhibition and will be promoting their local calibration and repair services alongside their market leading range of EMC test instrumentation and amplifiers.

A three booth stand will display a selection of EMC test instruments, such as multifunction generators, integrated signal generators and an extensive range of CDNs and LISNs. Also on display will be the TESEQ range of high-power microwave and RF amplifiers as provided by the MILMEGA, IFI and TESEQ brands.

Also, exhibiting for the first time at EMC UK will be Teseq Calibration Services. From their fully UKAS accredited labs in Wokingham, they offer customers an extensive range of calibration and repair services.

With a primary aim of minimising customer downtime, Calibration Services provide UKAS accredited or traceable calibrations either on-site, or on a return to base basis, on all common EMC test equipment.

Pat Moore, Managing Director of Teseq UK comments" As the acknowledged worldwide EMC experts in the design and manufacture of test instrumentation and amplifiers and as a provider of EMC test services through our fully accredited calibration facility, we are well placed to address many of the needs of professional EMC test engineers."

UK System designers and OEM manufacturers will benefit from working with Teseq who can provide a wide offering of traceable and UKAS calibrations on a full range of equipments, while providing both competitive pricing and turnaround times. Teseq also offer a full repair service to support Teseq test equipment as well as other manufacturers' EMC test equipment
