Maury Microwave Corporation

Leading Manufacturer of Laboratory Devices and System Components

Maury Microwave Corporation enjoys an enviable reputation in the microwave test and calibration industry. We earned that reputation by meeting the needs of our customers for over 43 years, and by developing, delivering, and servicing a comprehensive line of precision instruments, coaxial and waveguide components, and support products.
We are a leading manufacturer of laboratory devices and microwave system components, with special emphasis on device characterization and **Automated Tuner Systems.**
Located about 40 miles outside of Los Angeles in Ontario, California, our 96,000 square foot facility is within minutes of Ontario International Airport (ONT). Here, we design and manufacture some of the finest microwave products available; products known worldwide for their high performance, quality, and reliability.
Our factory is equipped with the latest CNC machines and can handle high volume as well as small quantity precision manufacturing. We maintain a state-of-the-art microwave laboratory with the latest test equipment supporting our test and calibration operations.
Maury calibration services are available for every product we make, and are performed in a controlled environment with the latest in measurement and verification equipment.
Our engineering and technical expertise enables us to meet customer needs in all phases, from design and manufacturing through after-sale service.
We realize that our success is a direct result of the combined efforts of the Maury Team. Our team members share a strong commitment to increasing and improving the excellence of our service to our customers, and are dedicated to the pursuit of quality. **Quality is not just a word at Maury &#151 it's a commitment!**
