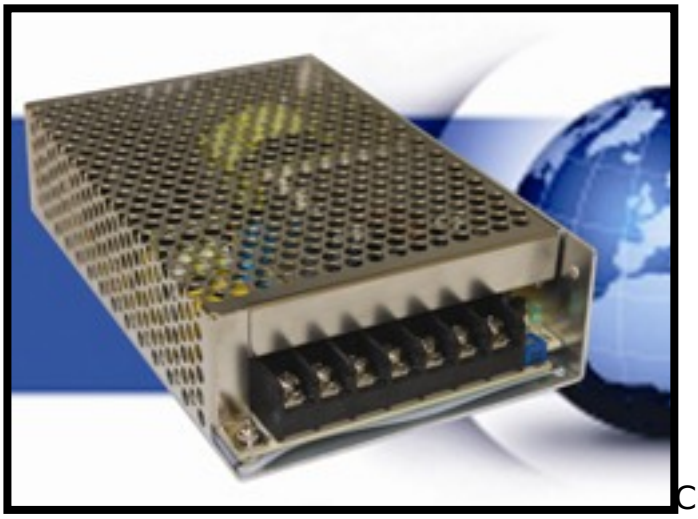
100-W Chassis Mount AC-DC Power Supply Touts Versatility



ConTech, a Division of Calex Mfg., announces the “CM100” Series of AC/DC switching power supplies. The CM100 Series offers 100 Watts of fully regulated output power in a chassis mount case, which makes it well suited for many applications. The easily accessible terminal block and output voltage adjustment potentiometer give it the versatility to be used as a power solution in a large assortment of applications.

The CM100 series has a universal input voltage range of 88 to 264 VAC. The series offers output voltages of 12, 24 and 48 VDC, with efficiencies up to 84%. The CM100 series has protective features such as, Short Circuit, Over Voltage, and Overload protection. The metal cage type chassis mount case is designed for free air convection cooling. The CM100 series is rated for 3000 VAC isolation, is RoHS compliant, and has UL 60950 approval pending.

Pricing for the CM100 Series is $22.50/ea. Units are available from stock to 6 weeks. To view a complete data sheet of the CM100 series go to http://www.ConTech-us.com/pdf/cm100.pdf [1]. To see our complete product line visit our website at www.ConTech-us.com [2].
