

May/June 2012 - Is Digital Power The Right Choice?

[1]The May/June issue of *Wireless Design and Development* includes features on a host of topics, including:

- Is Digital Power The Right Choice
- Selecting the Optimal Low Noise Amplifier for Your Application
- Extreme Environments Demand Extreme Lithium Power
- Secondary-Side Bridge Rectification For Wireless Charging Applications

Also, check out our *Tech Exchange* on Base Station Design, and *Brainstorm* on Oscillators and Timing Devices. If you're on the go, flip to the *No Strings Attached* Podcasts page, scan the QR code and listen to hear about the most innovative wireless technologies.
