

Inductor Engineering Bulletin

Sprague-Goodman offers a 12 page Engineering Bulletin featuring their complete, expanded line of SURFCOIL[®] chip inductors. Bulletin SG-800G incorporates features, specifications, and outline drawings for the nineteen series that comprise the line, including the 0201 size series, the higher current low DCR 0402 size series, the wirewound 0402 series, two wirewound 0603 size series, and a higher current 1812 size series. Laser cut, wirewound-on-core, and molded bobbin wound types are available. The charts list inductance, Q, self-resonant frequency, rated current, and DC resistance.
