

Ideal 'Under \$100' Holiday Gift for Car and Truck Owners

FOUNTAIN VALLEY, Calif., /PRNewswire/ -- Are you searching for a practical, yet cutting edge gift for your friends and family? This year, give the gift that's sure to impress all of the car and truck owners in your life - the CarMD® Vehicle Health System. This easy-to-use system gives drivers a way to check for hidden problems or find out why the "Check Engine" light is on without having to wait until the repair shop opens.

CarMD is ready to use right out of the box, and includes everything needed to monitor a car's health - an easy-to-use handheld device, Mac/PC software, USB cable, two AAA batteries, handy storage pouch, and lifetime software and firmware updates.

CarMD works on all 1996 and newer vehicles manufactured for use in the U.S. - foreign and domestic. To use, just plug it into your vehicle's on-board diagnostic port (don't worry, CarMD.com will show you where it is on your car), and CarMD does the rest! Its color-coded lights will tell you if your car has any problems lurking under the hood, if the vehicle is ready for that long trip, lets you know if you'll pass your emissions test, solve "check engine" light problems and more.

Whether you know a lot about how cars work or don't have a clue, CarMD offers the complete solution to keep your car in top condition. It's also a very practical gift to help drivers save time and catch problems early before they lead to costly repairs or safety hazards.

When a problem is found, CarMD customers simply use the included Mac/PC software and their own computer to tap into CarMD's unrivaled online database to generate a Vehicle Health Report. You get an easy-to-understand overview of what's wrong and what it will take to fix it - down to estimated parts and labor costs in your zip code.
