

## **Cisco Updates Wireless Certification Program Exams and Courses**

Cisco announced that it has updated the CCNA Wireless and CCNP Wireless Exams and Courses, which provide job ready practical skills and knowledge to address the latest advances in the wireless networking industry.

Leading industry analysts are predicting wireless and mobility to be high growth areas in 2012, increasing the demand for a properly trained wireless LAN (WLAN) workforce. Successful integration of the WLAN into an enterprise network depends on skilled IT professionals for proper integration, installation, maintenance and management. A Cisco wireless certification helps to deliver those skills and training by teaching and validating the ability to configure, implement and support wireless LANs using Cisco equipment. The Cisco Wireless Network Certification Program confirms the practical skills and best practices valued by the wireless networking industry.

### **Key Facts/Highlights**

€ Additions to the wireless training and exams include:

- o Wireless Mesh (Indoor and Outdoor)
- o Cisco CleanAir technology
- o Revised Voice over Wireless sections
- o Video over Wireless
- o Newer hardware (WLC 2500, WISM2, WLC-SRE, Flex 7500, AP 3500, AP 600, Wireless phone 7925G)
- o Security configurations for Autonomous AP
