

## **SecurityCoverage Signs Distribution Agreement with SYNEX Canada**

Cedar Rapids, IA - [SecurityCoverage Inc.](#) [1] has announced the company has entered into a distribution agreement with SYNEX Canada.

SYNEX will become the exclusive Canadian distributor for the "Ultimate Mobile Accessories" From SecurityCoverage, extending the strong demand for the firm's products already seen in the U.S. since their release.

"We are pleased to develop a relationship with SYNEX Canada, Canada's leading distributor to retailers and system builders," says SecurityCoverage President and CEO, Bob O'Dell. "Combining their numerous reseller communities and vast retail expertise with our device, data and complete protection products continues the strong demand we're seeing with our mobile product offerings."

Available under the SecureIT Mobile, Password Genie Mobile and Mobile Suite titles, the products were introduced at the 2013 Consumer Electronics Show. The titles feature apps that secure user smartphones and tablets, protect critical user data, backup contacts and files, include secure cloud storage, AND provide unlimited, live support for the entire device.

The SYNEX Canada distribution agreement continues the strong demand for the products, which are launching with several US retailers this month. SecurityCoverage is in active discussion with a number of additional top US retailers, and more distribution and launch announcements are expected in the coming weeks.

"We've seen tremendous demand for these products in the US, with significant early interest by retailers and wireless carriers," O'Dell says. "SYNEX has very strong relationships with the largest and best retailers in the Canadian market, which provides SecurityCoverage with major new opportunities."
