

MACOM to Showcase Industry's First X-Band Core Chip, Innovative GaN in Plastic L Band Module, and Highest Power E-Band Power Amplifiers at European Microwave Week 2013

MACOM

M/A-COM Technology Solutions (MACOM) will showcase a broad portfolio of new products for aerospace, defense, and network applications, and will present a technical paper during European Microwave Week in Nuremberg, Germany, October 6-11, 2013. Event attendees can visit MACOM at European Microwave Week in Nuremberg, Germany, October 6-11, 2013, Booth #169.

Speak with our experts to solve your unique application design challenges.

Visit MACOM's booth to learn more about the:

- Highest power GaN in Plastic-packaged power transistors.
- Integrated GaN modules for the L- and S- frequency bands.
- Industry's first X-Band core chipset.
- Highest power E-Band MMIC power amplifier.
- Lowest power EML driver for 100G optoelectronics applications.
- Linear amplifiers for 13/15/18 GHz cellular backhaul.
- Broad catalog of 2000+ reliable standard products.

Exhibition Hours - October 8-10, 2013:

Tuesday, October 8, from 9:30 AM - 5:30 PM

Wednesday, October 9, from 9:30 AM - 5:30 PM

Thursday, October 10, from 9:30 AM - 4:30 PM

Paper Presentation: Meeting the need for low cost integrated solutions with E/D PHEMT

Hear expert Henrik Morkner/MACOM present his paper, "A Compact Sub-harmonic Pumped Integrated 18-30GHz Balanced Image Reject Down Converter based on E/D mode PHEMT"

Date: Monday, October 7

Where: EuMIC, St. Petersburg Conference Room, NCC Nuremberg, Germany

Time: 9:50AM -10:10 AM
