

Janus Remote Communications and Exosite LLC Announce Collaborative Agreement

Janus Remote Communications

Aurora, IL — Janus Remote Communications and Exosite LLC announced that they have formed a partnership to provide end-to-end remote monitoring solutions to the M2M marketplace.

Cooperatively named EmerJ Solutions, Janus and Exosite will offer customers an extensive list of EmerJ hardware, software, and service products to meet their customers' remote monitoring end application requirements. EmerJ Customers will have the option to incorporate partial hardware and/or software solutions or full end-to-end implementations, with each particular product chosen for its end use fit.

Base EmerJ solutions will be available off-the-shelf with standard features and functionalities and will be fully customizable for any application. EmerJ monitor and control offerings are available in the areas of Digital Signage, Vending, AMR, Industrial systems, Atmospheric testing, Lighting, Oil & Gas, Elevators & Escalators, and all Remote asset management applications.

“For the first time in the M2M space, customers will have the ability to choose from a growing menu of hardware, software and service items to complete their end product applications--with only one point of contact for full technical support,” remarked Dave Jahr, General Manager of Janus Remote Communications. Hans Rempel of Exosite adds that “Customers will be able to immediately deploy cloud-connected products with proven wireless & data-acquisition capabilities. EmerJ will guide customers to the best solution available for their application.”

EmerJ solutions are available now through Janus and Exosite.
