

Spirax Sarco Launches New Educational

Spirax Sarco

Blythewood, SC – May 15, 2013 - Spirax Sarco announced the launch of: Heat Exchange Stall – the latest educational video on their YouTube Channel playlist.

The Spirax Sarco YouTube Channel offers free videos on various educational topics targeting the industrial and institutional markets. This video demonstrates the particular problems associated with the removal of condensate from temperature controlled heat exchange equipment including the cause, symptoms, and effects of ‘stall’.

“The Spirax Sarco ‘Stall’ video was created to give steam system designers and operators a visual insight to the most effective way to operate Steam Heat Exchange. By using a ‘closed loop’ system, customers will increase the performance and longevity of their heat transfer equipment, thereby saving energy while reducing maintenance costs,” said Bruce Moninghoff, Vice President for Spirax Sarco Sales.

After watching this video, you will have a complete understanding of the principals of heat exchange stall and why it is so important in today’s modern facilities.

Contact your local Spirax Sarco sales representative today for more information about ‘stall’ and how to prevent it within your facility.
