## Battery Adapter

iTECH (Intelligent Technologies LLC) announces the release of a "Type 3" battery adapter compatible with NiMH and lithium ion StarTac, StarTac Piggyback and Nextel i1000 batteries, designed to interface with the iTECH IQfive(r) battery maintenance systems. The adapter features a battery communication system that identifies battery chemistry and determines charge rates. This adapter features boost circuits to apply an appropriate higher charge rate for lithium ion and a faster charge. Multiple protection circuits offer back up safety for lithium ion. IQfive® software V9.35 or later, or a serial number beginning with "Lfive" models with software V9.2.
