## **Broadband Low Noise Amplifier**

Planar Electronics produces a variety of amplifier products that can operate up to 20 GHz. The PET Model No: PE2-20-R518-12-T-SFF covers from 0.3 to 18.0 GHz (reduced bandwidth units are also available) with 12 dB of gain with high reliability. It is a low noise amplifiers designed using the latest hybrid MIC/MMIC technology with a built in voltage regulator and temperature compensation. Size of unit shown is 0.75" x 0.43" x 0.31 and the weight is less than or equal to 1.0 oz.
