

Cable Load Assemblies

KDI/Triangle Corp.'s "Resistor Products

Group" offers a wide selection of "Cable Load Assemblies," made with a choice of either Beryllium Oxide (BeO) or Aluminum Nitride (AlN) resistive elements.

CW Power Levels range from 50 to 250 watts. These competitively priced devices can be factory tuned for a VSWR as low as 1:04:1. KDI's "Cable Load Assemblies" feature semi-flexible cables in sizes of 0.080 and 0.141 diameter with SMA connectors as standard. Other cable sizes, styles and connectors are also available.

All units are designed to operate over the temperature range ± 55 to 100 C.
