

Amplifier Research

The screenshot shows the Amplifier Research website. At the top left is the logo 'AR AMPLIFIER RESEARCH'. To the right is the tagline 'World Class Instruments For RF Testing.' Below this is a navigation menu with items like 'All Info', 'What's Hot', 'Products & Services', 'Amplifier Search', 'Tech Specs', 'Sign Up/Downloads', 'App Notes & PDFs', and 'Help'. The main content area features a large image of a microwave amplifier unit. Above the image is the text 'Microwave Amps.' and below it is the specification '0.8 to 40 GHz, 1 to 2000 watts.' A short paragraph describes the product's capabilities.

www.amplifiers.com/

Amplifier Research offers a world class line of high power, broadband RF amplifiers and related test accessories, as well as the most comprehensive web site in the industry. AR's "S" Series amplifiers are particularly well suited for wireless and telecom applications because of their linear, low noise output power and frequency coverage from 0.8 - 4.2 GHz. You can find a full listing of these amplifiers, with links to the product's data sheets on our web site. AR's price list, downloadable literature, application notes and software demonstrations are also easily accessible.
