

Microwave Coaxial Connectors Catalog

Dynawave has issued a new catalogue of its Microwave Coaxial Cable Connectors. The Microwave Coaxial Connector catalog provides specification data for electrical, mechanical, and environmental parameters, along with material and finish information for the connector body, spring, center contact, insulator, and O'Ring.

Detailed schematics are provided for the connectors, jacks, plugs, adapters, interconnects, and accessories. The catalog also includes an index that cross-references part numbers to the page on which they appear.
