

## Universal 60

The UNIVERSAL 60, a premiere member of Christie's innovative Pro-Ease family, is now available wherever Christie products are sold. Previously available only through exclusive dealers, customers now have access to the UNIVERSAL 60 through all Christie distribution channels, as well as factory-direct. As the industry's easiest-to-use aircraft battery charger/analyzer, UNIVERSAL 60 offers more standard features than competitive products.

UNIVERSAL 60 meets the stringent demands of the aviation industry with high performance and an affordable price. With digital current settings, simple operating instructions, and clearly labeled settings and indicators, UNIVERSAL 60 ensures professional, in-house battery maintenance for vented NiCd and vented/sealed lead-acid aircraft batteries. Standard features include digital voltmeters, temperature protection, and single cell charging capability. UNIVERSAL 60 also provides self-calibration without disassembly and the flexibility to handle any battery chemistry. The versatile functionality and sophisticated design of UNIVERSAL 60 makes it ideal for in-shop battery servicing, providing lowered costs and reduced downtime. UNIVERSAL 60 features 60A charge in addition to 60A discharge. Additional benefits of the UNIVERSAL 60 include constant current charge, dual charge, constant potential charge, and constant current discharge.
