

## Miniature Snap-Action Switches

E-Switch announces the immediate availability of its new line of miniature snap-action switches.

The SM Series Miniature Snap-Action switch line from E-Switch features UL94VO switch housing and actuator button. With a variety of contact ratings, the switches are available with nine different actuators, each with four operating force options. The SM Series offers solder lug, quick connect and right angle PCB pin terminations. The current lead-time on this newest addition to the broad line of E-Switch product is six to eight weeks. The SM Series is well suited for applications that require an economical, long life, reliable switch. Applications such as automatic food and beverage vending machines, packaging machines, photocopiers and many other consumer appliances.
