7/16 Connector Series

Compel Electronics announces the availability of their 7/16 connector series.

Operating from DC to 8 GHz, the new line complies with the IEC and CECC standards. Intermodulation properties typically measure -165 dBc. Brass housings are available with silver or ternary alloy plating options.

To facilitate numerous applications, male & female designs are available to accommodate semi-rigid, flexible and corrugated cable, and press-fit, panel or bulkhead mounting. All styles are available in straight or right angle configurations. Custom cable assemblies are available upon request.
