

Battery Adapter Compatible With Lithium Ion

iTECH announces the release of a lithium ion battery adapter compatible with Motorola Saber MX1000, MX2000 and MX3000 radios (battery part number NTN8818A). This adapter design uses the radio bayonet-type interface and eliminates the need for multiple adapters to support multiple capacities.

iTECH battery adapter part number BA6501 is compatible with the iTECH iQ^{five}® battery analyzer/conditioner with software version 9.3 or higher. The iQpac® personal analyzer charger supports Saber batteries with adapter part number PA6501. Select BA7001 for the iQten battery tester.
