

Right Angle BNC Connectors

These 75-ohm right angle BNC connectors from Molex RF/Microwave Connector Division maximize performance and space for a variety of RF applications. These BNC connectors are designed for applications operating from DC to 2 GHz, including data networking, video, and telecommunications. The product is available in three profile heights: .6250, .5000, and .3420 above the mounting surface.

Voltage rating for the connector is 500 Vrms. Dielectric withstanding voltage is 1500 Vrms. Temperature range is -20°C to +70°C.

Available with non-tipping board lock or round PCB mounting pins, these lightweight connectors offer a two-lug bayonet coupling system. The system provides an easy-to-use quick connect/disconnect device for long lasting durability.
