AC Cable Port Connector

FCI's Communications, Data and Consumer (CDC) division, formerly Electronics, is pleased to announce the latest in its PwrBlade[®] family of products. The PwrBlade AC Cable Port Connector is a one-piece connector for AC (input) and DC (output). The connector is available in right angle and vertical receptacles. The right angle receptacle is available in solder and the vertical receptacle is offered in press-fit. FCI's PwrBlade cable port is shrouded for protection and boasts a locking bar for contact retention. FMLB contact allows up to three levels of power and signal sequencing: 2 levels for power, 2 levels for signal. FMLB contacts for cable port are also available from FCI.
