

## Flat Panel Antennas

Mobile Mark offers Flat Panel Antennas for 5 GHz applications. The antenna features 24 dBi gain with a front-to-back ratio of 35 dB or better. Compact size (15 inches $\times$  15 inches $\times$  2 inches) keeps wind loading to a minimum. A radome covering provides weather protection. These antennas mount easily to the pole; 15 $\times$ 176 adjustment.
