

Varistors

The NV73 series varistors protect electronic components against static electricity, switching and incoming surges, making them ideal for a variety of electronic equipment applications. NV73 series metal oxide varistors are available in sizes 0603, 0805, and 1206. Varistor voltages range from 4.2 V ~ 56 V with maximum peak current (@ 8/20 μ s) of 30 A, 10 A ~ 50 A and 30 A ~ 70 A depending on the size and style of selected component.
