

Vertical Receptacles

FCI's Communications, Data and Consumer (CDC) division has added Hard Metric Vertical Receptacles to its Millipacs(r) family of products. Features of the vertical receptacle include optional shielding and optional rear plug-up (RPU) tails. In addition, when used with FCI shrouds, true positioning of RPU tails is achieved. Millipacs® HM Vertical Receptacles are utilized in the telecom, datacom, medical, industrial and instrumentation markets.
