

## Lithium Coin Cell Holders

A series of holders for quick and easy installation of 2032 lithium coin cells in high-density applications, these new holders are rugged and ideal for retaining cells securely under shock and vibration. The surface mount version is available in bulk (Part #1060) and on tape and reel (Part #1060TR) and is compatible with most vacuum and mechanical pick and place assembly systems. All models feature .010 inches phosphor bronze, electro-solder over nickel plate contacts and a glass-filled LCP, UL rated 94 V-0 base.
