

Aluminum Electrolytic Capacitors

Combining long life, low ESR, and high ripple current capability, the miniaturized BCc 158 PUL-SI snap-in capacitors will save space in applications where long-term reliability is critical. Each device is rated for an operating life of 5000 hours at an ambient temperature of 105°C and maximum ripple current. These capacitors offer standard voltages from 16 to 100 V, and are available with capacitance values of between 560 µF and 47,000 µF. Case sizes range from 22 × 25 mm to 35 × 50 mm, and both two- and three-pin snap-in options are available as standard.
