

Field-Bus Connector

The Y-Con series includes the Y-CONRJ45, which can be used in field-bus applications such as Ethernet. In addition to the RJ45 data transmission properties, the compact connector is also equipped with 2 power supply contacts. It fulfills either IP67 or IP20 protection requirements, is vibration resistant to 50 g, and can be used in a temperature environment from – 40 to +120°C. The Y-ConRJ45 system is also Cat 5 compatible, guaranteeing transmission rates of 100 megabits per second.
