

## Power Drawer Connector

Anderson introduces the 35 and 75 amp Power Drawer connector. The connectors are used on N+1 power supply and inverter systems for a variety of applications. The 75 amp Power Drawer can be configured with up to four #8 awg, nine #12 awg, and twenty-four #20 awg contacts. Both pin and socket contacts are available with crimp, solder cup or printed circuit board termination. The 35 amp Power Drawer can be configured with up to eight #12 awg contacts and twenty-one #20 awg contacts.
