

## Drop-In Isolators

TRAK Microwave introduces a drop-in isolator used in Private Mobile Radio (PMR) for NMT450 base station applications. The model 104647B isolator has an operating frequency range of 460 to 468 MHz, with return loss of 20 dB maximum, insertion loss at 0.4 dB maximum and isolation at 21 dB minimum. With excellent IM3 performance, the isolator provides integral termination, tab interface, a rugged design in standard outline and is ideal for high volume base station applications. **[www.trak.com](http://www.trak.com); (813) 901-7200**
