

Low-Cost Transceivers

Smaller than a credit card, the cost efficient 9XCite's 900 MHz Wireless Transceiver Module provides FCC-approved, Frequency Hopping Spread Spectrum, TTL (or RS-232/422/485) communication an extremely low price. The 9XCite requires no set-up, operates from 2.85 - 5.50 V DC, provides long range with receiver sensitivity of -108 dBm, extends battery life using power-down mode of $18 \mu A$, and delivers data throughput rates of 9600 bps and 38400 bps.
