

Ovenized Oscillators

ILSA introduces the low cost OCXO I405 and I411 series of ovenized oscillators featuring a selection of oven oscillators for frequencies from 1.0 MHz to 100 MHz. The series offer two packages and three output types: I411, at 20.5 × 20.5 × 11 mm with either HC-MOS, AC-MOS or Clipped Sine Wave outputs, and the I405, 36 × 27 × 18 mm (CO-8) package with either HC-MOS, AC-MOS, or Sine Wave output. Both versions are available with either SC or AT cut crystals and require either a 5 V DC or 12 V DC supply. Stabilities to ± 0.05 ppm are available.
