Power Line Filter

Schurter introduces a snap-in version of its filtered AC connector designed for use in power supplies rated up to 20 Amps at 125 volts (16 A/250 V). the AC inlet is designed according to IEC 320-1, type C20, and is combined with a standard or medical grade filter. The filter is available with a typical surge withstand (> 2.5 kV, L-N), or with added surge capability (> 4 kV, L-N).
