## Fuseblock Cover

Schurter's easy-grab fuseblock cover, the OGN series, is an all-in-one fuseblock solution that is available preloaded with 5 × 20 mm fuse and fitted cover. The cover grabs hold of the fuse, removing it when the cover is lifted. The thermoplastic material of the OGN socket is rated UL 94V-0. It withstands high soldering temperatures. Mounting variations include surface mount with a footprint of 23 × 6 mm or through-hole with a pitch of 22.5 or 25 mm.
