## Patch Antenna

The Micro-Ant model PCA3.5LSL is a dual band stacked patch antenna that features two isolated connectors on its backside. It may be used as a stand-alone antenna or as a feed in a reflector system. This antenna is available in other frequencies and polarizations, and may be purchased within a sealed radome enclosure. Frequency is 1700 at 15 MHz, 2242 at 20 MHz; gain is 7 dBiC, both bands; polarizations is LHCP/LHCP; and VSWR is 1.5 max.
