

Multi-layer Ceramic Capacitors

AVX Corporation introduces the LD series of multi-layer ceramic capacitors. The LD capacitors offer tin-lead solder terminations, with 5% lead minimum. The series is appropriate for military products, missiles, guidance systems, communication and radar equipment, and space products such as satellites, rockets and rovers. Available in a wide range of sizes, from 0402 to 0612, the LD Series offers voltages ranging from 6.3 V to 500 V.
