

## Telematic Platform Reduces Time-to-Market

Morey Corporation announces the introduction of its Enabling Telematic Solution Set for the hardened-electronics industry including the new WarHammer™ Platform featuring Wavecom wireless CPUs. Wavecom's Q24 series wireless CPUs enable WarHammer to support a choice of GSM or CDMA communications protocols for reliable connectivity in remote locations. WarHammer represents the convergence of wireless communications, GPS location technology and the Vehicle/J-Bus interface into an innovative single platform for the 'hardened electronics' market to reduce time-to-market for a diverse set of emerging telematic applications.
