Expansion of Line-card

Mouser Electronics, Inc. announces the expansion of its line-card by signing 31 additional electronic component suppliers in the first half of 2007. With an already extensive portfolio of products across the board, the additional suppliers bolster the product choices for Mouser's unique design engineering customer base. The additional manufacturers represent all the major electronic product categories including semiconductors, embedded modules, optoelectronics, passives, interconnects and wire/cable assemblies, electromechanical, power, test and measurement, as well as tools and supplies.
