

Brand Feed Through Filters and Capacitors

Tyco Electronics Corporation introduces a line of CORCOM brand feed through filters and capacitors. These filters are suitable for AC applications ranging from 10 to 300 am/s, and DC applications ranging from 10 to 200 am/s. They are designed for high frequency applications such as servers, base stations, routers, power supplies and telecom. CORCOM FFA series feed through filters are rated for 250 VAC and comply with 5000 V pulse testing. FFD are designed to meet the requirements of EN133200 class Y4 and 2500 V pulse testing
