

Mini DC/DC Converters Feature Wide Input Ranges

Power Sources Unlimited announces that 80 models of its TMR series wide input DC/DC converters are available in an ultra compact, encapsulated SIP package. Both 2:1 and 4:1 input ranges are available, handling input voltages from 4.5 VDC to 75 VDC. Standard models feature single or dual outputs of 3.3 VDC, 5 VDC, 12 VDC, 24 VDC, ± 5 VDC, ± 12 VDC or ± 15 VDC. Power ratings are 2W for the TMR-2 and TMR-2WI series, while the TMR-3 series offers 3W in the same compact SIP package. Standard features include isolation of 1,000 VDC or 1,500 VDC, remote ON/OFF and comprehensive protection circuitry. All models are rated for -40° C to +85° C operating temperature, they are highly efficient (up to 84%), and they have a three-year product warranty.
