Femtocell SoC Delivers to 25 Simultaneous Subscribers

DesignArt Networks' DAN2200 WiMAX femtocell SoC provides non-blocking WiMAX performance for up to 25 simultaneous subscribers. The IEEE 802.16e Wave 2-certified component uses software-centric multi-core architecture to exhibit plug-and-play installation, embedded synchronization options and automated installation and operation of WiMAX femtocell clusters. The product is based on DesignArt Networks' open 4G SoC platform.
