

Tablet PC Software Tests Wi-Fi Sites

Berkeley Varitronics Systems' Swarm™ tablet PC software operates on indoor and outdoor Wi-Fi site surveys. The program combines Yellowjacket® 802.11b/a/n/g Wi-Fi receiver measurements with GPS geo-coding accuracy. The software enables survey bitmap creation, scanning for all 802.11b/a/n/g channels with automatic correlation, and exporting of data including RSSI, MAC and SSID.
