

Customizable Broadband and WiMAX Filters

Sangshin Elecom offers fully customizable Broadband and WiMax filters. A leading supplier of ceramic filters, Sangshin offers over 700 designs in these areas with frequency coverage from 6.0GHz in both narrow and ultra wide bandwidths. Configurations range from 2.5 mm through 6 mm heights and from 2 to 6 poles. With the ability to match a custom footprint already in use, the company provides a competitive option to other suppliers. For more information contact Sangshin's exclusive technical distributor, RFMW, Ltd.
