

AT&T USBConnect Lightning from Sierra Wireless Coming

DALLAS, /PRNewswire-FirstCall/ -- AT&T* announces a new 3G LaptopConnect device from Sierra Wireless, the AT&T USBConnect Lightning, will launch in retail stores, business channels and online nationwide beginning November 22.

The Lightning delivers enhanced mobile broadband performance on the nation's fastest 3G network for quick and easy Internet access while on the go. It will be compatible with AT&T's High Speed Packet Access (HSPA) 7.2 technology, which provides a considerable speed boost to the 3G mobile broadband network where deployed.

For customers with the need to access email, the Internet and business applications from their laptop while away from home or work, the Lightning offers the perfect solution. AT&T 3G mobile broadband speed built into a small and elegant design that includes an illuminated face plate and USB hinge for use with different laptop designs provides an ideal mix of form and function. Connecting in more places is now even easier with AT&T's global network compatibility and access to AT&T's more than 20,000 Wi-Fi hotspots.
