

Digi-Key Corporation Stocking Amphenol® Connex High Performance BNC for Video Connectors

Digi-Key Corporation announced it now has stock on Amphenol Connex's High Performance BNC for Video Connectors. These connectors are ideal for use in high performance video applications. Features of these BNC bulkhead jacks include 75 Ohms impedance, an industry-standard design, precision-machined from brass, space-saving end-launch termination, and a durable PTFE insulator to support high temperatures. The end-launch termination saves space in high-density applications in which panel space is critical. These high performance BNC for video connectors can be used in video routers and switching equipment; video control panels; video display and monitoring applications; and video add-on cards.
